

Invitation to Real Estate Industry Breakfast

CMS and Pedersen & Partners

"Is there a misalignment between the Real Estate sector and the real economy and do we see any symptoms of a new meltdown?"

The Real Estate industry is seeing an oversupply across some asset classes while the number of investors and available bank financing is increasing. Do market fundamentals support current aggressive yield compression? Does the current level of lending truly reflect the market conditions?

What trends will we see on the CEE market? And are we heading toward another bubble?"
